

## **The Experimental Fish Car**

**By Sandy Motley and Tom Chettleborough**

**The Experimental Fish Car is an automobile that is based on the Yellow Boxfish. It was designed and manufactured by Mercedes – Benz; its official Name is the Mercedes Benz Bionic.**

### **The Fish itself**

**The yellow boxfish (Ostracion Cubicus (its Binomial Name)) can be found in reefs throughout the Pacific and Indian Oceans as well as the south Eastern Atlantic Ocean. The biggest recorded size was 45cm (18inc). As said in its name, it is box-shaped. When juvenile, it is bright yellow but as it gets older the colour fades away and it becomes a shade of blue, grey and faded yellow all mingled together.**
